Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5 and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Cirone.

Cirone teaches a device adapted to be used with a female recess tool for clamping a mobile element to be completely inserted in the female recess and to be maintained therein the device comprising an element having three dimensions, one of the three dimensions being substantially smaller than the other two of the three dimensions and being located in a plane perpendicular to an axis of clamping of the mobile element, the element marking or identifying the dimension of the tool, and being complementary to the shape and being secured and removed in the female recess by forces of friction, (col. 7, lines 10-16). (The Examiner notes that friction is used when one pushes the self-adhesive sticker into the female recess, and when one pulls the sticker for removal. The Examiner also notes that if the element has writings that identify the dimensions, the ink on top of the element is considered to be multi-layered.)

Allowable Subject Matter

Claims 4,6-13 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Arnold et al. was cited to show another example of a device for labeling tools.
